

Available exclusively as a black 3-door, only 325 examples of Saab's new-for-1993 900 Turbo Commemorative Edition have been produced by the Swedish automotive innovator. With 185 Hp, this limited edition features the most powerful engine ever offered in a Saab 900. The Commemorative Edition is also distinguished by a performance-tuned chassis and special alloy wheels with polished outer rims and gray asymmetric centers. The suggested retail price is \$32,605.

The Commemorative Edition's tan leather upholstery is contrasted by its exclusive wooden instrument panel facia, offered for the first time in any Saab 900. As with all other 1993 Saabs, a driver's-side air bag is standard equipment and, since the Commemorative Edition is powered by a turbocharged engine, a Compact Disc (CD) player is included in the package.
